To whom it may concern, and i believe it concerns all woman past, present and future. As a woman who has had 4 homebirths it angers me that the government thinks it can take away not only my right to birth in a safe space, but that of my daughter and my sons partners. I had had 5 children and the first was born in a hospital which was a very stressful and unnecessary. The other 4 as i said were home made and born. I am in no way a so called hippy I am just a normal woman who wants normal safe births. I also had midwives at my births which is what helped make them safe.

I'm not very good with words but i will ask that you reconsider the current draft legislation that will make illegal for midwives to attend homebirths and to support woman's rights to birth where and how the want. After all it is our bodies and our right to choose. Going forward with this draft WILL push home birthing underground and make things unsafe. And who will be responsible for that????

NOT the woman, but the people who have taken away the right to birth at home safely

Thank you for your time
