

Practitioner Regulation Subcommittee

Thank you for the opportunity to comment.

I am a Clinical Midwifery Consultant employed in the Sydney South West Area Health Service and I feel strongly that midwifery should be on a separate register, as it would be inappropriate to include two different professions within the same register. Midwives have a very different role to nurses and this distinction is made clear to the public.

On another note I with many of my colleagues agree national registration is a move forward professionally.

Regards,

Lyn Passant
